Overlap welding nozzle

The overlap welding nozzle for RiOn and LiiOn hand welding tools.

This nozzle enables a precise 40 mm weld seam, easily achieved by guiding the hand welder. Its specialized design allows it to be used in hard-to-reach areas, such as edges, parapets, eaves, or other obstructions, without difficulty.

Thanks to its optimized geometry, the material to be welded can be easily threaded in and out, simplifying overall handling. The nozzle is tailored to meet the requirements of all common roofing materials, ensuring reliable and consistent welds, even under demanding conditions.

It is ideal for welding ResiTriX membranes as well as other thermoplastic roofing materials and tarpaulins. With the HERZ hand welding devices and the special overlap welding nozzle, you achieve the best results.

Matching accessories such as pressure rollers and the full range of nozzles can be found on our website: www.herz-gmbh.com.
